NEUROFLOW® | Medicaid

An estimated 29% of Medicaid members have a mental health condition.

Is your population getting the appropriate support?

NeuroFlow enables behavioral health integration across care management for better needs identification, lower costs, and improved care manager efficiency.

Your population faces unique challenges and stressors. NeuroFlow is designed with these in mind:

- Multimodal outreach and activation strategy to engage even the hardest to reach
- Medicaid-compliant reading levels for digital programs and support for Spanish
- Crisis intervention and suicide prevention as a leading focus
- Resources for Social Determinants of Health localized to your members' geography
- Universal remote screening across the population to identify behavioral health needs
- Ability for care managers to efficiently prioritize outreach

Referrals to Medicaid-relevant partners for behavioral health care

NeuroFlow has partnerships with a wide range of behavioral health care providers and leverages triage capabilities to point members to the right level of support for their needs.

Bicycle Health | BRAVE HEALTH™ | monument | Brightside Health

A technology platform supporting both members and care managers

MEMBER / DEPENDENT

- Screenings and wellness trackers
- dCBT and other digital programs tailored based on risk level
- Configurable, localized crisis resources

CARE MANAGER

- Caseload prioritization tools
- Clinical decision support and alerts for high and rising risk members
- Optional staffing for crisis intervention and suicide prevention

53% of Medicaid members in programs using NeuroFlow that have depression experience clinically significant improvement in 4-8 months

NeuroFlow helped to identify mental health conditions in **19%** of members previously treated only for their physical condition.

Care team satisfaction score of **90** out of 100
