

Get the Right Members to the Right Level of Care at the Right Time

The best-in-class technology and services you need to address behavioral health crises before they happen

62%

of users remain engaged with NeuroFlow after the first month

(NeuroFlow client data)

72%

of users with initially severe depression scores dropped to moderate or better within 8 weeks

(NeuroFlow client data)

50%

of members in a recent study had a higher need for behavioral health support than predicted by their claims data

(McKinsey)

Tech-Enabled 24/7 Support for Your Entire Population Prevents Adverse Events and Unnecessary Utilization

ENGAGE

Self-care activities and frequent remote screenings are delivered automatically via app, individually tailored based on member needs and risk level.

MEASURE

Robust reporting tools provide 24/7 oversight as our AI-based algorithms risk stratify the population and match members to the right stepped level of care.

MANAGE

Higher risk members are referred to behavioral health services with digital support between visits, and response services can be staffed for interventions in urgent situations.
