

# There is 1 Death By Suicide Every 11 Minutes in the United States

It has never been more critical to invest in crisis support. NeuroFlow enables your organization to identify and monitor members in real time, and intervene before it's too late.

## For every suicide death, there are:

4

Hospitalizations for suicide attempts

8

Emergency Department visits related to suicide

27

Self-reported suicide attempts

275

People who seriously considered suicide

## Reduce avoidable ED utilization and hospital admissions, and support members with suicidal ideation through NeuroFlow's solution for suicide prevention

Localized crisis resources delivered immediately when needed

24/7 remote monitoring and risk stratification of your population

Urgent and at-risk member alerts delivered in real time to care teams

NeuroFlow Response Coordinator outreach in urgent situations

## Annual screenings and retrospective claims reviews are insufficient to catch suicidal ideation

of individuals flagged as at-risk for suicide through NeuroFlow's NLP technology would not have otherwise been identified through conventional screening methods.
